Education

University of Sheffield   *Sheffield, UK*

BSc (Hons) in Computer Science - Class One   *Sept. 2015 - July 2018*

- Developed a gamification system for unit testing in Ruby consisting of a web application and Ruby gem **(Dissertation Project - 76%)**.
- Created as a team a website using Express for creating, viewing and rating restaurants **(The Intelligent Web - 74%)**.
- Developed in a team a web application for student registration and staff monitoring for a client in a department of the university using Ruby on Rails. Team was awarded Software Hut Prize by client for the production of the best overall software **(Software Hut - 92%)**.
- Completed a week-long interdisciplinary engineering team project which involved producing a solution for the potential use of swarm robotics in agriculture and presenting to a panel from the industry **(Engineering: You're Hired! - Distinction)**.
- **Technical Skills:** Ruby, Java, JavaScript, Python, Haskell, HTML, CSS, SQL, Database Design, Git

Woodhouse College   *London, UK*

A-Levels   *Sept. 2013 - July 2015*

- Achieved an A in Computing and B grades in Mathematics and History.
- Created a Tuition Management System using VB.NET for A2 Computing coursework.

Hendon School   *London, UK*

GCSEs   *Sept. 2008 - July 2013*

- Achieved 7 A grades, 2 A* grades and Distinction in ICT: Digital Applications.

Experience

Feastly Ltd   *London, UK*

Temporary Technical Consultant   *Aug. 2017 - Sept. 2017*

- Collaborated with the director in the first few stages of software development by designing a web application that catered specifically for the company's needs in managing and improving their core menu and recipe building process.
- Provided a draft for the project brief, created flowcharts for the current system and wireframes for the proposed system.
- Created web pages for their WordPress website to show their lunch menus for each client - the lunch menus were located in a Google Sheets document, read in JSON format and outputted using PHP and JavaScript. This automated the process which previously required an employee emailing their clients. Created a User Manual for this.
- At hand to perform website improvements and tweaks e.g. CSS changes.

Ratcliff IT   *London, UK*

Intern   *Aug. 2016 - Sept. 2016*

- Gained valuable insight into the role of an IT Support Engineer by observing and learning how to prepare and resolve client enquiries.
- Handled client queries over the phone, organised return deliveries of items and carried out hands-on tasks alongside their ticketing system, e.g. preparing a new laptop for a client by following the standard procedure.
- Assisted with the company's migration to a new system by moving over documentation as well as merging and improving duplicate SOPs into a single document.

Marks and Spencer   *London, UK*

Salesfloor Customer Assistant   *July 2015 - Aug. 2015*

- Advised and assisted customers with finding products or offering suitable alternatives, resolved customer complaints in a professional and considerate manner.

Hobbies and Interests

- Reading technological websites (e.g. PhoneArena and the Verge) and watching tech videos online to keep abreast with the latest news, particularly about mobile phones, gaming and PCs.
- Playing table tennis and football - was previously competitive in table tennis for Barnet Table Tennis Club and was chosen to represent the borough of Barnet in the London Youth Games consecutively for 3 years.
